**WASHINGTON STATE RESIDENTIAL TREATMENT AGENCIES**  
**THAT ACCEPT**  
**PUBLICLY FUNDED CHEMICAL DEPENDENCY**  
**TREATMENT PATIENTS**

**August 22, 2005**  
**(3<sup>rd</sup> Revision)**

**Provided by**

**Division of Alcohol and Substance Abuse**

## **Introduction**

Welcome to the Publicly-Funded Residential Treatment Provider's Directory provided by the Division of Alcohol and Substance Abuse (DASA). This directory is a tool that is designed to augment and enhance the information already provided in the Directory of Certified Chemical Dependency Services in Washington State, also known as the DASA Greenbook.

This directory is intended for use by treatment providers, referring counselors and assessment centers, as well as the general public to assist in the facilitation of treatment services in Washington State. The directory includes not only basic contact information for each center, but enlists several other features of the facility as well.

### **Features:**

- ◆ A breakdown of the agencies' bed capacity of both publicly-funded beds and private pay beds as well as a listing of what types of funding sources are accepted at any particular agency. Assists in making choices for treatment of any persons referred to residential care based on the funding source of the individual.
- ◆ Specific admission criteria listed for each individual agency including specific admission criteria, admission exclusions, and clients that the agency will consider on a case-by-case basis. Assists in the process of getting client referred to appropriate types of programs and allows all who use the tool to be aware of admission processes prior to making the referral to a particular center.
- ◆ A snapshot look at the philosophy that each particular agency employs in the treatment of clients in individual programs. The sections "Client Focus" and "Brief Description of Treatment Philosophy" describe the agency's approach to therapy, patient care, outcomes or other information applicable to the treatment of clients at each particular agency.
- ◆ A section regarding "Other Services Provided" which offers each agency the opportunity to showcase the many other services that it may provide. Other services range from outpatient treatment to vocational skills training to education assistance. Allows all who visit the website to see the whole range of services that are offered in Washington State's residential treatment services section.

We at DASA strive to increase the information dissemination in order to increase access to available services and increase the possibilities of living healthy lifestyles for all Washington State residents. We believe that this tool increases our progress toward attaining this goal. We do, however, see this as a living document and plan to update it regularly. We therefore welcome your comments on how it may be improved.

## Listing of Agencies, County in Which Located, and Population Served\*

\* Adult Treatment Expansion patients (SSI, GA-X, GA-U, TANF, Medical Assistance clients), can be treated at any residential agency that provides the level of care needed by the client and accepts public funding for services. After completing an assessment and determining the level of care needed, please contact that agency directly with any referrals for residential treatment to make arrangements for admission.

(Click the name of the program to be taken to that programs information)

**Specific Strengths of Agency**

Established agency with over 20 years of residential experience. Low staff turnover, experienced and well-trained staff.

**Specific Admission Criteria**

ASAM PPC Level III.1

**Specific Admission Exclusions**

Sex offenders depending on offense; Violent criminal history depending on history; Arsonists depending on history; Detoxification for people on benzodiazapines.

**Clients the Program Will Consider With Case Consultation**

All clients will be considered based on level III.1 admission criteria. Those listed under exclusions would be based on individual history.

**Other Services Available**

Outpatient, and facilitate vocational training, GED, other education and sober housing.

**Brief Description of Treatment Philosophy**

Chemical dependency is a treatable illness that affects individuals as well as their families and associates at multiple levels of their lives. While not curable, alcoholism and other drug addictions are treatable. We subscribe to a holistic approach in the treatment of chemical dependency. The central goal of all chemical dependency treatment programs operated by the Clark County Council on Alcohol and Drugs is abstinence. With proper assessment and referral to appropriate treatment modalities, by continued abstinence from psychoactive drugs, and by inclusion in self-help programs, alcoholics and other drug addicts can and do recover from their disease.

## **Client Focus**

Long-term treatment for chemically dependent women who are pregnant or with young children in their care. Specialize in women with personality disorder, backgrounds of trauma, and involved with CPS. DSHS Licensed therapeutic day care program six days a week for infants and children up to age 5 in residence with the mother.

## **Specific Strengths of Agency**

Treatment includes not only traditional CD treatment and 12-step orientation, but also Dialectical Behavior Therapy and mental health counseling. Smoking cessation program includes hypnotherapy as well as pharmacological aids.

## **Specific Admission Criteria**

Must be able to climb stairs, as our buildings are two-stories. Must understand that smoking is not allowed and smoking cessation is a part of the treatment program.

## **Specific Admission Exclusions**

Must be physically and mentally able to participate in treatment.

## **Clients the Program Will Consider With Case Consultation**

Will take women on methadone once dose is stabilized. Will consider women on psychotropic medications.

## **Other Services Available**

Case-managed transitional housing following discharge from treatment is available, and planning begins while the woman is still actively engaged in residential treatment. Co-occurring outpatient support groups (MICA) co-facilitated with local mental health center. Dual disorder intensive outpatient treatment. On-site detox facility for preadmission detoxification.

## **Brief Description of Treatment Philosophy**

Chemical dependency is a disease treated by abstinence from alcohol and other mood-altering drugs. The goal of our treatment is to provide the individual with tools for self-awareness and clean and sober living that will support the patient after they have completed the residential treatment experience. Both group and individual counseling provide opportunities for patients to come to understand addiction as a disease and to become aware of the triggers that could lead them to

relapse.

Treatment of the family is important to breaking the dysfunctional relationships that become established during active addiction, so families are encouraged to participate in our weekend family education and counseling sessions. Mental health counseling is available as an optional component of the program for those women who also have psychological issues, including family of origin and trauma. Familiarity with and long-term use of self-help recovery support groups is also a goal of treatment.

## **Client Focus**

The co-occurring disorders program will provide up to six months of declining intensity residential treatment for pregnant or parenting women with significant mental health issues. The program will not serve seriously mentally ill but will accept women with mood disorders, personality disorders, and post-traumatic stress disorders. Potential patients on medications must be sufficiently stabilized to participate in all phases of the treatment program. Chemical dependency treatment will be supplemented with regular onsite mental health counseling and parenting training. Specialize in women with personality disorder, mood disorders, backgrounds of trauma, and involved with CPS. DSHS Licensed therapeutic day care program six days a week for infants and children up to age 5 in residence with the mother.

## **Specific Strengths of Agency**

Long-term treatment regimen includes not only traditional CD treatment and 12-step orientation, but also focused mental health counseling and Dialectical Behavior Therapy. Specialize in women with mood and personality disorders, and backgrounds of trauma. Work closely with CPS. Parenting education in group, individual, and experiential settings. Will transport resident for daily methadone doses. Smoking cessation program includes hypnotherapy as well as pharmacological aids.

## **Specific Admission Criteria**

Must be able to climb stairs, as our buildings are two-stories. Must understand that smoking is not allowed and smoking cessation is a part of the treatment program.

## **Specific Admission Exclusions**

Must be physically and mentally able to participate in treatment.

## **Clients the Program Will Consider With Case Consultation**

Will take women on methadone once dose is stabilized. Will accept women stabilized on psychotropic medications when able to fully participate in treatment activities.

## **Other Services Available**

Case-managed transitional housing following discharge from treatment is available,

and planning begins while the woman is still actively engaged in residential treatment. Co-occurring outpatient support groups (MICA) co-facilitated with local mental health center. Dual disorder intensive outpatient treatment also provided in outpatient. On-site detox facility for preadmission detoxification.

### **Brief Description of Treatment Philosophy**

Chemical dependency is a disease treated by abstinence from alcohol and other mood-altering drugs. The goal of our treatment is to provide the individual with tools for self-awareness and clean and sober living that will support the patient after they have completed the residential treatment experience. Both group and individual counseling provide opportunities for patients to come to understand addiction as a disease and to become aware of the triggers that could lead them to relapse.

ADATSA, Treatment Expansion, PPW

**Client Focus**

PPW and ADATSA

**Specific Strengths of Agency**

Job training, diverse and stable staff with many years of commitment to our agency. Treatment activities provided (groups/1-1 counseling) far exceed the requirements.

**Specific Admission Criteria**

18 years or older, ADATSA eligible, drug or alcohol addiction

**Specific Admission Exclusions**

Sex offenders; Arsonists; Violent criminal history (depends on severity).

**Clients the Program Will Consider With Case Consultation**

Borderlines; Antisocials; Bi-Polar; Anxiety disorders; Depression. Patients are allowed to take antidepressant drugs, anti-anxiety or meds for bi-polar. We do not allow patients to take sedating drugs or sleep-aids or anti-psychotics.

**Other Services Available**

Job training, GED preparation, Outpatient, Vocational counseling, Therapeutic childcare, Parenting classes and counseling.

**Brief Description of Treatment Philosophy**

A team of professionals and recovering addicts skilled in reality therapy confront the patients' maladaptive attitudes and behaviors. The patients are believed to change their negative behaviors by practicing positive behavior until it is internalized. We look into issues that may have been a contributing factor to drug use. Patients learn daily living skills in a family atmosphere. (Therapeutic community)

## **Client Focus**

Adult Men & Women, Native American

## **Specific Strengths of Agency**

1. We continually examine, evaluate and improve the methods we use to respond to the needs of our patients and our community.
2. We seek to identify new ways of providing the best possible service on a continual basis.
3. We are solution-oriented - individually and collectively responsible for carrying out our mission.
4. We create a work environment which encourages innovation and is open to creative approaches to accomplishing our mission
5. We are committed to professional growth through training, education and self-improvement.
6. We endeavor to maintain the highest ethical standards throughout our organization.
7. We conduct and promote activities that reduce the stigma of chemical dependency.

## **Specific Admission Criteria**

Olalla Recovery Center uses the appropriate PPC for patient admission. Admission also includes the patient's ability to meet the following criteria:

1. Progression of the patient's disease does not prohibit patient from benefitting from treatment at the appropriate level of care.
2. Patient's living environment and support base of family and/or significant other is conducive to recovery at the appropriate level of care.
3. Patient's physical and emotional level of dysfunction from his/her chemical use does not inhibit him/her from benefitting from treatment.
4. Patient's capacity and motivation are conducive to achieving and maintaining abstinence from chemical use at the appropriate level of care.

## **Specific Admission Exclusions**

The patient may not be:

1. A resident of any drug addiction or drug abuse treatment program.
2. Showing acute opiate withdrawal.
3. Showing acute barbiturate withdrawal.
4. Showing acute benzodiazepine withdrawal.
5. A sex offender.
6. An arsonist.
7. Admitted with a violent criminal history.

### **Clients the Program Will Consider With Case Consultation**

Patients on any type of medication will require a case consultation prior to admission.

### **Other Services Available**

None noted

### **Brief Description of Treatment Philosophy**

Alcoholism and other drug addictions constitute a primary, chronic disease with genetic, biological, psychological and environmental factors influencing its development and manifestations. The disease is progressive and fatal if untreated. Like any other illness, chemical dependency must be treated by skilled professionals. Since 1969, we have successfully treated all aspects of this disease, including the needs of special populations. At Ollalla Recovery Centers, we provide the means to achieve and maintain abstinence. Patients are respected, their confidentiality is observed and understanding extended to them during this difficult time.

**Funding Sources Accepted:**

ADATSA, Treatment Expansion

**Client Focus**

Prosperity Wellness Center (PWC) is a long term residential chemical dependency program specially designed for adult women; those needing recovery skills, environmental support, and personal empowerment.

**Specific Strengths of Agency**

Our primary focus is for chemical dependency recovery, and we address the following substances with general education, group problem solving dynamics, and weekly individual sessions: methamphetamine, cocaine, heroin, alcohol, marijuana, nicotine, and other substances that may be a dependency or abuse issue. We view nicotine as a primary drug of choice and leading cause to relapse for other substances as well as a primary health care issue; therefore, PWC is a tobacco free environment.

**Specific Admission Criteria**

For entry, a contact with Penny Bissenas, our admissions coordinator must be made with information of DSHS eligibility. She can be reached at our parent facility, Prosperity Counseling & Treatment Services, Inc. 253-863-9667; her fax number for review of referral information is 253-863-6516.

The following needs must be met for financial obligation and medical stabilization:

1. Current medical coupon through DSHS, must be TANF/CNP or Pregnancy/CNP
2. Referral from Treatment Provider, CSO, CPS, Personal/Self referral, Physician, Attorney, GAL, or other concerned person (assessment is recommended, but not necessary if chemical dependency issue is verbally reported)
3. If entering with a child, a current medical coupon and proof of immunizations, social security, and proof of custodial rights.

**Specific Admission Exclusions**

------------

## **Brief Description of Treatment Philosophy**

<p>We additionally address parenting and child development with as much emphasis as we do the dependency issue. Parenting is a difficult job, and for women with substance dependency, possible relationship violence or aggression, mental health components from trauma histories, and other historical factors, it can be overwhelming. Our in-house therapeutic childcare center is designed to advance the children's' individual domains of growth and development. Mothers learn basic child development and relational bonding &amp; attachment needs in the educational and process groups led by the therapeutic childcare director. Our staff is familiar with high-risk infants and utilizes information from the Kent PIC unit. University of Washington's NCAST trainings are also utilized for our parenting support.</p>
--

<p>We work closely with the Division of Children and Family Services, as we understand the goal for safe, productive reunification of these families. We also work closely with drug courts and various judicial systems to support reconciliation from the destruction caused by behaviors of chemical dependency. PWC maintains a "personal responsibility" view of the recovery process.</p>

## **Client Focus**

Ryther Child Center offers a variable length of stay inpatient program licensed by the Washington State Division of Alcohol and Substance Abuse as a Level Two Secure Program. This designation indicates the most highly structured and secured form of adolescent chemical dependency treatment licensed in the State of Washington. There are two ten bed facilities, one for each gender. All patients being admitted need to have been assessed as chemically dependent by a referring agency, and assessed to meet the admission standards of ASAM Level 3.5. No patient will be admitted, or retained, if their symptoms do not require care at this level. Patients involved in the Intensive Inpatient Program are adolescents (13 - 17 years) who have failed (continued relapse, non-completion) Intensive Outpatient or who have been diagnosed as middle to late stage in their addiction. Treatment plans are individualized and length of stay is based upon completing established treatment goals. Within the treatment spectrum, Ryther identifies both the patients' and their families' strengths and weaknesses and work diligently to improve the dynamics and communications that ultimately will bring an informed, supportive family to bear upon an adolescent firmly entrenched in a recovery based, clean and sober life style.

Adolescents are referred for chemical dependency treatment by parents, doctors, schools, Juvenile Courts, teen clinics, psychiatric Hospitals, including Fairfax and Overlake Hospitals in the Seattle Metropolitan area, the Department of Social and Health Services, Division of Alcohol and Substance Abuse (DASA) and the Juvenile Rehabilitation Administration (JRA). Referrals are classified as Level II secure referrals, a designation that signifies not only the Chemical Dependency addiction diagnosis, but additional multiple diagnoses that include impulsive disorders, anger management problems, Attention Deficit Disorder/Attention Deficit Hyperactive Disorder, Learning Disabilities and Mental Health related problems that include Post Traumatic Stress Disorder, Personality Disorders including oppositional and antisocial behaviors. A high majority of these referred youngsters have histories of family dysfunction, physical, sexual abuse, and homelessness. All youth referred have profiles of high risk behaviors leading to consequences of magnitude in social, physical mental and legal realms.

## **Specific Strengths of Agency**

Ryther Child Center is accredited through the Council on Accreditation for Children and Family Service Agencies (COA). This national accreditation holds Ryther to a higher standard of care than is allowed through minimum WAC standards. Evidence of this includes a 1:5 staffing ratio during waking hours, graduate level

case managers, and excellent continuous quality improvement strategies.

Ryther Child Center offers full mental health and family counseling services to the patients served. There is one mental health therapist assigned for approximately every five patients in inpatient care. This services includes individual and group counseling, a full bio-psychosocial assessment, a mental health status exam, family counseling, intensive case management, and referral for psychiatrist and psychological services to Ryther's Medical Director and staff Psychologist. All these services are provided in addition to the full abstinence based chemical dependency treatment.

Ryther Child Center has an on-site Challenge Course (Ropes Course) and a graduate level full-time Experiential Coordinator. Through this, Experiential Learning is able to be incorporated into the recovering lives of our patients. Experiential learning is an action-oriented way to teach. It helps participants understand the way they approach problems, interact with others, communicate, and take risks. The patients are involved in three different Experiential Groups every week. These groups may include activities on the Challenge Course, weekly Adventure Treks, and experiential cottage activities. Ryther Child Center is located in King County. Currently the only level II secure facility in King County for adolescent girls, and only one to two such facilities for adolescent boys.

Ryther Child Center has a certified school teacher employed and is able to offer some school credits for patients in care.

Ryther Child Center has over a 20 year established history of provided quality Chemical Dependency Services. The agency is fiscally sound, with good administrative oversight.

## **Specific Admission Criteria**

Patients eligible for admission to intensive inpatient are:

13 - 17 years old (18-year-olds considered with a waiver and determination of clinical appropriateness)

1. Diagnosed at middle to late stage
2. Passes a current TB Test
3. Ambulatory
4. Medically stable (not in need of detoxification)
5. Able to live in a residential setting
6. Demonstrate a willingness to participate in treatment activities

In addition patients admitted must meet at least three of the following:

1. Inability to abstain from alcohol/drugs for even a short period of time
2. Unable to control use at the time of assessment (i.e. under the influence at assessment)

3. History of relapse
4. Serious social, educational or vocational dysfunction, as evidenced by family rejection, school expulsion or inability to maintain gainful employment
5. Weak, absent or destructive support system
6. History of chemical dependency in the family
7. Need to be removed from current environment to facilitate recovery
8. Experiencing high degree of emotional trauma that requires therapeutic support
9. Disabling withdrawal
10. High level of denial and rationalization

### **Specific Admission Exclusions**

Patients with no, or minimal, Chemical Dependency issues.

### **Clients the Program Will Consider With Case Consultation**

1. History of fire setting
2. History of sexual offense
3. Extensive or serious criminal history such as violence against non-family members or felony offenses
4. Severe and/or recent homicidal ideation or behaviors
5. Severe and/or recent suicidal ideation or behaviors
6. Evident and unmanaged psychosis preventing the effectiveness of chemical dependency treatment

### **Other Services Available**

#### **EARLY ENGAGEMENT:**

By the very nature of the patients served at Ryther, many new admits are not exhibiting a strong desire or a readiness to change. Ryther's unique and empathetic method of engaging such patients in this stage of pre-contemplation allows them to honestly examine their addiction without feeling challenged or attacked. The adolescent mindset is often not open to direct challenge, and such method only push the patient further away from needed services. While we never fail to maintain a strong program structure and consistency, staff are equally well trained in how to use back-door approaches and to develop ambivalence in the patient. In the end, this is what leads to a willingness to change, and even better, a change that is done with internal motivation, as compared to forced external compliance.

#### **MILIEU MANAGEMENT:**

Inpatient Chemical Dependency treatment at Ryther Child Center is based on a phase system designed to focus on self-responsibility. Progress through the program is determined by the patient's accomplishment of treatment goals and general rules of conduct in a community environment. Patient's progress through the phase system is largely determined by behavioral demonstration of treatment goal

completion. From the first day of placement, each Patient receives a daily behavioral treatment sheet with specific observable behaviors and treatment goals for that day. As they complete each task, staff will immediately notify them of positive progress and provide written and/or verbal feedback. As Patients are immediately externally motivated for exhibiting appropriate behaviors, generalization of learning will occur into other areas of their recovering life. Overtime, Patients will develop long term patterns of making positive choices and will be able to identify their own reinforcements. Towards this end, staff will constantly seek for positive behaviors to engage with and reinforce youth for.

Rule violations, behavioral non-compliance, and other non-healthy demonstrations will result in engagement by staff in attempt to capture the learning moment and further instruct the Patient towards new behaviors. Staff will give Patient specific feedback on the non-compliant behavior of concern, options for reasonable alternate behaviors, and results of any poor choices made. Staff will do such interventions in a way that allows for the locus of control to stay with the Patient and encourages ambivalence and internal conflict, while avoiding power struggles and confrontation. Once non-compliant behavior has been addressed, staff will again seek for positive behavior(s) to engage with and reinforce. Additionally, most rule violations will not result in removal of already earned privileges, unless safety concerns override clinical decisions.

The milieu manages behavior 24 hours a day, and strives to model social living skills and the need to live within the authority structures common to society.

#### **GROUP SESSSIONS:**

Group therapy and education is the primary treatment modality used to enact change. Each patient receives up to 20 hours per week of counseling and education. All group curriculum is based on best-practice research proven methods. Ryther is committed to using such models (with some variation for our unique population) because they have been clinically proven to improve the long term success of our patients. The current groups include:

1. Drug Education Group - Living in Balance (2 Times a Week)
2. Recovery Enhancement Group - The Seven Challenges (2 Times a Week)
3. Independent Living Skills Group
4. Experiential Therapy Group - Use of Challenge Rope Course (2 Times a Week)
5. Dialectical Behavioral Therapy Skills Group (3 Times a Week)
6. Adventure Trek - Weekly Wilderness Hike

Each group is designed to enact change through experiential hands-on learning. The dynamics of personal experiences and concepts shared within the group meeting, and the responses shared in reaction, are immensely valuable to the treatment process.

#### **INDIVIDUAL CHEMICAL DEPENDENCY COUNSELING:**

Chemical Dependency Professionals, or Trainees, meet regularly with each patient to solidify recovery concepts learned in the milieu and/or group sessions, to provide an opportunity to review treatment assignments and plans, and to allow the staff to determine if the patient is "internalizing" the principles of recovery. The emphasis of work done by a CDP, or CDPT, is to focus primarily on the disease of chemical dependency, along with directly related areas that they are qualified and competent to work within.

#### MENTAL HEALTH THERAPY:

CD treatment is augmented and enhanced by a Master's level counselor who provides a basic mental health status examination for all Patients in placement for a week or longer, and on-going individual therapy at a level and frequency determined to be needed. The primary goal of the Mental Health Specialist is to work with other emotional/cognitive issues that are presented by the patient that may impact, but are not directly part of the chemical dependency treatment (anger, depression, anxiety, etc.). Additional consulting and direct assessment services are provided by our Agency Psychologist, and our Psychiatrist Medical Director.

#### FAMILY SUPPORT AND EDUCATION:

Master's level Case Managers work with families from admission through treatment until discharge. The primary goal of the work is to work with the family to remove or overcome any obstacles to successfully transition the patient back to a longer term placement option that would best support his or her recovery, such as; home, Recovery House, Independent Living Program, or to another viable placement option. The Case Managers also coordinate a monthly Parent Night with appropriate lectures and support groups, and a monthly Family Day which allows for intensive discussions and an opportunity to identify and modify enabling behavior and other family dynamics.

#### PHYSICAL EDUCATION & RECREATION:

Each patient will receive up to one hour a day, for at least five days a week, of cardiovascular activity. This primary focus of this time is to teach the patients about the benefits of physical health as related to their recovery, to encourage sportsmanship and health competition, and to provide a clean and sober recreation activity. Emphasis is placed on personal growth, physical fitness, skill development, and an increased ability to enjoy him/her self without the use of chemicals. A well-trained staff member facilitates the program.

#### SCHOOL:

Ryther Child Center is an official part of the Seattle School District and has an on-site certified teacher. While in treatment, patients are exposed to both classrooms and tutoring in order to continue their educational process. Ryther does not offer full school services, but covers some educational basics so patients don't fall too far behind. Depending on length of stay, patients can earn some transferable credits in elective categories such as Art, Health, Physical Education, and Language Arts. School is a mandatory part of C.D. treatment at Ryther.

**SELF HELP GROUPS:**

The AA/NA philosophy is strongly emphasized in our program. Patients are given the opportunity to attend up to five self help meetings per week and are provided with the necessary transportation and time to accommodate this. Patient participation in self-help groups is highly encouraged during and after treatment as a vital step towards a total recovery program. Sponsorship in these programs will be explained and Patients will be assisted in obtaining a sponsor early treatment.

**SPIRITUAL AND FAITH EXPLORATION:**

For those patients who desire such services, Ryther Child Center has employed a Spirituality Coordinator who can help patients explore issues of faith and spirituality as it relates to their recovery. Patients are also offered voluntary spiritual experiences (faith groups, religious sessions, religious material, spiritual mentors, etc.) consistent with their belief system and expressed desire. Patients are also given the opportunity to go on pass to the faith meeting of choice.

**DISCHARGE AND AFTERCARE:**

Individualized discharge plans are established during treatment as goals set in the original treatment plan are completed and accumulate. The establishment of an ongoing support system is crucial to successful recovery. A relapse prevention plan is created with each patient as they progress through treatment. Having a sponsor and a connection to a 'Home Group' 12 step program are important supports which augment the family and the outpatient aftercare group. The outpatient aftercare group is part of Ryther's continuum of care for those who can geographically access it. For those who can't, the inpatient primary counselor works to secure such a group in the home locale of the patient. This often is the referring program since most patients originally came to intensive inpatient after having failed an intensive outpatient program. Ryther also has two outpatient treatment centers (located in North and South Seattle) to provide long term aftercare services for local patients.

**Brief Description of Treatment Philosophy****MISSION:**

The Ryther Child Center Chemical Dependence Residential Treatment Program exists to help adolescents between the ages of 13 and 17 who have engaged in abusing drugs and alcohol and who are chemically addicted begin their journey to recovery and health.

**PHILOSOPHY:**

Our Patients are our first concern. Many of our Patients come from unstable and chaotic environments where they have experienced one or more of the following issues in their homes; parental/adult substance abuse and addiction; domestic violence, adult neglect; physical, psychological, and/or sexual abuse. Frequently our Patients have experienced many transitions in living arrangements and "responsible" care givers and have faced periodic if not regular uncertainty and ambiguity in their

lives. Our Patients typically present multiple unmet needs ranging from medical and somatic matters to educational and spiritual deficits.

As capable and compassionate professionals we believe that our Patients have the following needs:

1. A safe, clean, secure, and sober environment.
2. A significant period of abstinence illicit, addictive and harmful drugs and substances.
3. Role models that offer empathic guidance, mentoring, direction and support.
4. Assistance in learning appropriate problem solving skills, coping skills, social skills and the creation, observation and preserving of appropriate boundaries.
5. Exposure and positive interaction with adults who are trustworthy, competent and who can provide genuine concern, solace and discipline.
6. Exposure to and involvement in a community that is self-responsible and culturally diverse and sensitive.

It is or should be understood by all Patients that acceptance by and admission to Ryther Child Center's Chemical Dependence Residential Treatment Program requires that they are willing to engage actively in treatment; that they take responsibility for their behaviors; that they learn, accept and comply with the rules of the program. Our Patients should also know that we believe that long-term successful recovery from addictions requires adoption and acceptance of the underlying philosophy and principles of the 12 Steps.

Recovery from addiction and the resolution of emotional problems is often a difficult and painful process or journey. Adolescence, by itself, is a transition or process that requires the patience and understanding of responsible adults. Accordingly, we acknowledge that not all Patients will not always follow the same path in the same time frames while making their journey.

The Ryther Chemical Dependence Residential Treatment Program is provided by a team of dedicated, committed and diverse group of professionals, certified, licensed and trained clinicians, counselors, and staff.

We believe;

1. Our program has a primary duty to address the addictions and chemical dependence of our Patients.
2. Addiction is a disease.
3. The mental health and emotional disturbances of our Patients must be addressed because they obstruct or interfere with recovery.
4. Abstinence is a primary treatment requirement and the over-riding goal of treatment.
5. Persons pursuing recovery will often experience challenges and setbacks that can also offer opportunities to learn and build for a stronger recovery.
6. That persons involved in helping our Patients must engage in a number of

positive behaviors with and in the presence of our Patients;

- Coaching, teaching and encouragement
- Guiding, directing, good advice and sound judgment.
- Comfort and solace, while setting appropriate limits and structure.
- Model appropriate behaviors, relationships, interactions and communications.
- Establish healthy rituals that support recovery and good health.
- Observe and adhere to the rules and practices that provide for the safety and security for all Patients.

We believe that in order to implement these concepts we, the staff, must also extend to one another and other staff at Ryther;

- Respect and courtesy
- Active cooperation and assistance
- Acceptance of all aspects of our diversity
- Help in continuous learning about the field and our assignments
- Value the contributions of others
- Promote and accept accountability for our conduct and performance.

-------

## **Client Focus**

Youth Residential Services for up to 120 days. The expected range is 30 to 60 days.

## **Specific Strengths of Agency**

Our program is inclusive and reflects culture sensitivity towards people of color, including clients with developmental disabilities and those who are bisexual, gay, lesbian and transgender. We have competent bilingual and bicultural staff on site. This agency commits itself to on-going and extensive trainings facilitated by Sea Mar staff and community agencies such as the University of Washington, DASA and King County Department of Youth Services. Working with these agencies helps strengthen our staff competencies as we continue to build a residential program that is specific to the community we serve.

## **Specific Admission Criteria**

A comprehensive chemical dependency assessment/evaluation completed no more than 6 months prior to referral to this program. Recent TB test completed.

## **Specific Admission Exclusions**

Level II sex offenders and clients diagnosed with severe mental illness.

## **Clients the Program Will Consider With Case Consultation**

We will consider all co-occurring and non-co-occurring referrals that don't meet exclusionary criteria.

## **Other Services Available**

This program provides comprehensive mental health screenings/evaluations. We teach Dialectical Behavior Therapy skills to clients and staff. We have a partnership with Seattle Public Schools education department; this gives us the ability to offer school credit to all our clients while they are in our program.

## **Brief Description of Treatment Philosophy**

We strive to achieve permanent changes by treating not only the adolescent's chemical dependency, but also addressing other life issues with a holistic approach. The holistic approach takes into account his/her behavior, emotions, attitudes, culture, family, physical/mental health, dental needs and their overall lifestyle.

Adult Long-Term Residential: 0	PPW: 0

**Funding Sources Accepted:**

ADATSA, Treatment Expansion
-----------------------------

## **Client Focus**

Patients learn to self-evaluate in order to make change

## **Specific Strengths of Agency**

Our philosophy base is choice theory. We use this cognitive behavioral model to help clients change their behavior. The Center does not automatically discharge clients for inappropriate behavior. We work to help them evaluate and change their behaviors.

## **Specific Admission Criteria**

Meeting ASAM criteria for this level of care.

## **Specific Admission Exclusions**

Users of Ritalin, Benzodiazapines, and narcotic pain medication will be evaluated on a case-by-case basis.

## **Clients the Program Will Consider With Case Consultation**

Mental health issues and medications associated with their mental health disease.

## **Other Services Available**

Detox and outpatient. The Center makes referrals to Oxford housing, PIC, DVR, consumer counseling services and other agencies in the area.

## **Brief Description of Treatment Philosophy**

The agency's Intensive Inpatient Program is based on William Glasser's theoretical constructs, Choice Theory and Reality Therapy. We believe that addiction is a disease process, but in order to place the disease into remission, the addictive behavior must be changed. Since the etiology of addiction varies, behavior is the best common denominator. We teach that all behavior is need fulfilling, and stems from the basic needs of love and belonging, power, freedom, fun and survival. The counselors work with their patients to evaluate current behaviors and develop new behaviors to get their needs met. There is also an emphasis on developing an internal locus of control rather than external. Patients attend chemical dependency self-help support groups while in treatment based on choice theory. Other self-help groups, including AA, NA and CT are introduced.

**Brief Description of Treatment Philosophy**

Consistent with chemical dependency is a disease, including alcohol. We provide treatment and family support to those affected by the disease. Our goal is to be responsive to the community of Yakima and the state of Washington so that people in need of service do not fall between the cracks.

We believe the disease is treatable and we offer a continuum of care including inpatient, outpatient, relapse prevention and support, education, therapy, and referral to family members of our patients. We consider the whole person and his/her needs. We provide intensive case management to assist the individual in addressing areas of their life that will assist in the achievement of a happy, healthy and productive life. We assist persons who have relapsed to return to recovery.
